

Monitoring & Alerting Checklist

My Personal VSCode Setup (Extensions + Settings)

Custom VSCode config used for DevOps, infrastructure-as-code, web development and better productivity.

Top Extensions

- GitLens (Git insights)
- Path Intellisense
- Bracket Pair Colorizer
- Prettier (formatter)
- ESLint
- Tailwind CSS IntelliSense
- AWS Toolkit
- Terraform
- YAML
- Docker
- Kubernetes
- Markdown All-in-One
- Error Lens
- Import Cost

Key settings.json

```
{  
  "editor.formatOnSave": true,  
  "editor.tabSize": 2,  
  "files.autoSave": "onWindowChange",  
  "editor.rulers": [80, 120],  
  "terminal.integrated.defaultProfile.windows": "Git Bash",  
  "workbench.colorTheme": "Default Dark+",  
  "files.exclude": {  
    "**/.git": true,  
    "**/node_modules": true,  
    "**/dist": true
```

Monitoring & Alerting Checklist

```
}  
  
}
```

Tips

- Sync settings to GitHub
- Use workspace overrides
- Standardise with .editorconfig
